

BC Energy Regulator

NOTICE OF INTENT TO CONTRACT

The British Columbia Energy Regulator (BCER) is hereby giving notice of the intent to establish a support agreement for operational support for its recently purchased software services from Novamodus Solutions Inc (formally Vigilant Consultancy Services Inc.) The support agreement services will be purchased through Novamodus who was the successful bidder on RFP23024001 (HCM System implementation). The following responsibilities will be within scope:

- Apply, test and document Oracle Fusion HCM quarterly updates.
- Guide and assist BCER staff with test executions for update releases.
- Provide Tier 2 and 3 operational support (including bug fixes).

The BCER has chosen not to tender this contract for the following reasons:

- The BCER is not looking to replace or move away from our current Oracle Fusion HCM solution and is purchasing operational support annually.
- Novamodus was the successful vendor through an RFP process to purchase Oracle Fusion licensing and implement the Oracle Fusion HCM product.

Oracle Fusion HCM experts or partners wishing to object to this decision should contact the procurement team via email at Procurement@bc-er.ca on or before **2:00 p.m. local time on August 28, 2024 presenting specific reasons for their objections.** Objecting Oracle experts or partners with the ability to offer the same level of service at a lower cost in the same time frame is the key criteria regarding the consideration of objections.
