

NOTICE OF INTENT TO CONTRACT

The British Columbia Energy Regulator (BCER) is hereby giving notice of the intent to contract with **Fixed Earth Innovations Ltd.** for the purpose of procuring local seed, and preparing customized seed and amendment mixes in gel capsules.

The following responsibilities will be within scope of contract:

The vendor will provide customized seed and amendment capsules for the purpose of revegetation in support of planned Orphan site restoration activities. Services may also include procuring a seed supply, local to the planting location(s), creating customized microbial amendments, mixing amendments and seed in optimal ratios, and creating gel capsules to facilitate effective seeding.

The BCER has chosen not to tender this contract for the following reasons:

1. The vendor, to our knowledge, is the only Peace region (Northeast BC) local company using tailored microbes to amend locally sourced native seed mixes to support the restoration efforts in revegetating reclaimed sites.

Vendors wishing to object to this decision should contact the procurement team via email at Procurement@bc-er.ca on or before **2:00 p.m. local time on December 19, 2025 presenting specific reasons for their objections.** Vendor ability to offer the same level of service at a lower cost in the same time frame will be the key criteria regarding the consideration of vendor objections.
